Description of Services: LifeShare Management Group provides the Shared Living model of Home Support all across the State of Maine, as well as Community Support through section 21 and 29. The structure of the Community Support is strictly community based, there is no center for an individual to attend. In this way the program is able to be tailored to activities in the individual's community. LifeShare does provide 1:2 staffing in the Community Support Program, with a focus on Volunteer Activities, Building Self-Esteem, Physical Fitness and Nutrition, Education, and developing Daily Living Skills. The Community Support program does not duplicate any supports that an individual would receive in a Home Support Program. LifeShare's Shared Living Program provides a 1:1 support in the home and community outside of work or community support hours. It is a focused and habilitative service designed to assist an individual with daily living skills in the home.
